Professional Summary

Computer Engineering student with hands-on experience developing Java applications using Object-Oriented Programming, JDBC, SQL, DBMS, and Data Structures. Interested in Java and backend development, with academic project experience in database-driven applications and structured software development. Seeking opportunities to apply programming and problem-solving skills while building practical and maintainable software solutions.

Technical Skills

Programming Languages: Java, SQL
Java Development: Core Java, Object-Oriented Programming, Collections Framework, Exception Handling, File I/O, JDBC
Database: SQL, DBMS, CRUD Operations, Relational Database Concepts
Computer Science: Data Structures, Algorithms
Tools: IntelliJ IDEA, Git, GitHub

Education

L.J Institute of Engineering & Technology <i>B.E. in Computer Engineering</i>	<i>Pursuing</i>
Shree Swaminarayan Gurukul, Junagadh <i>12th Standard, GSEB</i>	<i>2025</i> 74%

Projects

Music Player Management System	<i>Java, JDBC, SQL, DBMS, Data Structures</i>	GitHub
- Developed a Java-based music management application using Object-Oriented Programming principles to organize songs and playlists. - Integrated SQL database functionality using JDBC for storing, retrieving, and managing application data. - Applied Java Collections and Data Structures to organize and manage music-related data. - Structured the application using modular Java classes and exception handling to support maintainable application logic.		
Sign-In System	<i>Java, OOP</i>	
- Developed a Java-based sign-in system using Object-Oriented Programming concepts and structured application logic. - Applied classes, objects, methods, encapsulation, and input validation to organize the application.		

Relevant Coursework

Data Structures and Algorithms, Object-Oriented Programming, Java Programming, Database Management Systems, SQL, Computer Networks

Additional Information

Career Focus: Java Development, Backend Development, Database-Driven Applications, Software Engineering
